EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

The amendments filed After-Final on 09/23/2009 have been entered. With regard to

whether Applicant wishes to petition for acceptance of color drawings, Applicant states that

Applicant does not require the use of color drawings for printing purposes.

An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's

amendment which places this application in condition for allowance. Should the changes and/or

additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the

payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the

attorney Jerry Hefner on October 1, 2009.

The application has been amended as follows:

In the claim

Claim 87 filed on 09/23/2009 is replaced with the following:

Application/Control Number: 10/584,338 Page 3

Art Unit: 1632

The method of claim 86, wherein said embryonic stem cells are derived from a tissue selected from the group consisting of the morula and the inner cell mass (ICM) of an embryo.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

(1) Upon further consideration of Applicant's declaration filed on 05/12/2009 that multiple species of TGFβ superfamily, including activin A, activin B, GDF 8, and GDF11, have been demonstrated to enable the claimed method for in vitro differentiation of pluripotent human stem cells to human definitive endoderm, and in combination of claim amendments regarding recitation of "Wnt family member" instead of "Wnt pathway activator" filed on 09/23/2009, it is concluded that no undue experimentation is required to perform claimed methods pertaining to these aspects. With regard to the aspect of claimed methods reading on "induced human pluripotent stem cells" (i.e. iPS), it is noted that the term "pluripotent human stem cells" encompasses multiple species, however, upon further consideration, Applicant's arguments filed on 05/12/2009 that human iPS cells are similar to human embryonic stem (ES) cells and there is no evidence in the art supports that human iPS cells cannot be used in the claimed methods, have been fully considered and found persuasive. With regard to the aspect of serum concentration used in the claimed methods, Applicant clarifies that no serum or low serum concentration in the initial medium is a preferred, but not a limited, embodiment encompassed by the claimed methods. Therefore, as summarized in this paragraph, the scope of enablement rejection documented in the Final office action mailed on 08/20/2009 in is withdrawn.

Art Unit: 1632

(2) With regard to 102(e) art rejection anticipated by Fisk et al. as evidenced by Kuo et al, claim 76 filed on 09/23/2009 has been amended to recite "Wnt family member" instead of "Wnt pathway activator", the chemical n-butyrate disclosed by Fisk et al. is not a member of "Wnt family member" and is not an obvious variant of "Wnt family member". Furthermore, neither Fisk et al. nor Kuo et al. teaches or suggests using "Wnt family member" in combination with activin A, a member of TGFβ superfaimily disclosed by Fisk et al. Finally, it is noted that the end product of the methods disclosed by Fisk et al. are endoderm cells express the markers Sox17, HNF3β, and HNF4α (hepatocyte nuclear factor 4α), which are more differentiated cells than the end product of the claimed methods of instant application, definitive endoderm cells expressing SOX17 and HNF3β.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication from the examiner should be directed to WuCheng Winston Shen whose telephone number is (571) 272-4517 and Fax number is 571-2733157. The examiner can normally be reached on Monday through Friday from 8:00 AM to 4:30
